

Corporate Director of Information Technology

We are looking for a uniquely talented, high energy individual for a long-term and rewarding career in the industrial food ingredient industry. BCFoods is a global leader in offering a wide range of high-quality dehydrated vegetables, spices, and herbs to the industrial food ingredients industry. Our world-wide network of manufacturing and distribution centers allows for the delivery of high-quality products during all seasons of the year. We import products globally with supply partners and manufacturing facilities in many countries including China, India, United States, Mexico, Peru, Germany, Hungary, and New Zealand. Our product line consists of over 500 items, so complexity, challenge, and variety are the norm here. To learn more about us please visit our website at www.bcfoods.com.

Globally, we have over several hundred employees with our main goal of providing outstanding service and value to our customers in every location they do business in. The right candidate for this position will be at the center of BCFoods ongoing growth efforts through providing connectivity and information to the company's offices and business units worldwide.

We are looking for someone who is very personable, highly intelligent, technically competent in all aspects of information technology and who enjoys setting and achieving challenging goals. Honesty, professional integrity, highly organized with advanced critical thinking skills are also essential qualities. Having prior food processing experience is highly desirable along with the ability to periodically travel to the various facilities is necessary.

Location: Position is located at our North American Operational Headquarters in Santa Rosa, CA.

Description and Responsibilities

The candidate will have full responsibility for maintaining and providing strategic direction for the entirety of our IT environment including both hardware and software platforms for the entire corporation. Experience and competency will take precedence over academic achievements. We will be looking beyond the resume as candidates will be asked and expected to demonstrate their competency in the following areas;

Configuring and Maintenance of Servers, Networks & Misc Software Platforms

- Microsoft Office365 (Office Suite, Sharepoint/Cloud Backup, Skype/Teams, Visio, Planner)
